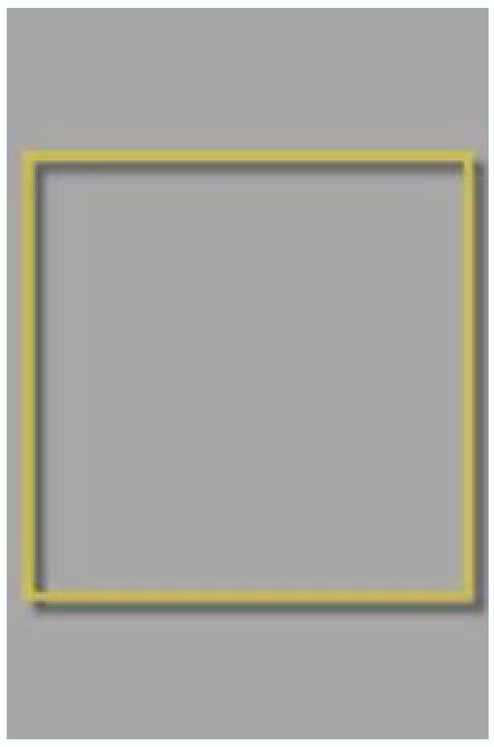
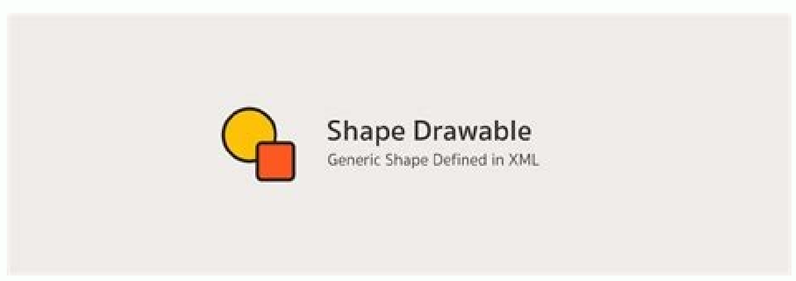
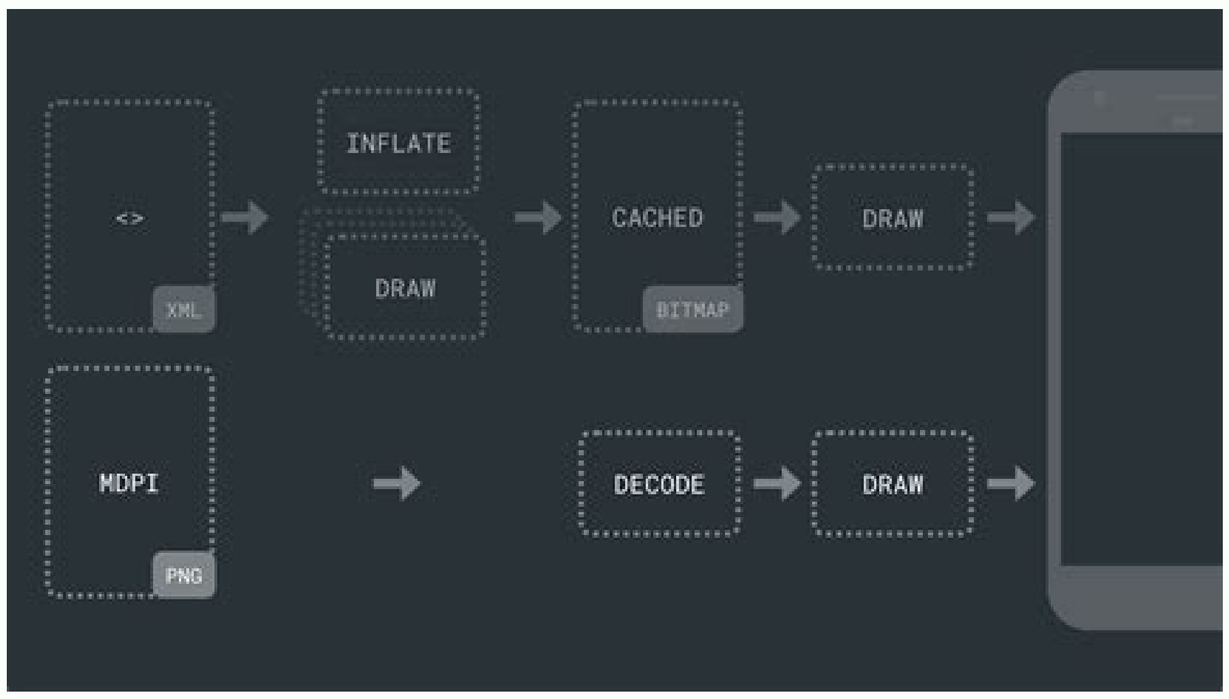
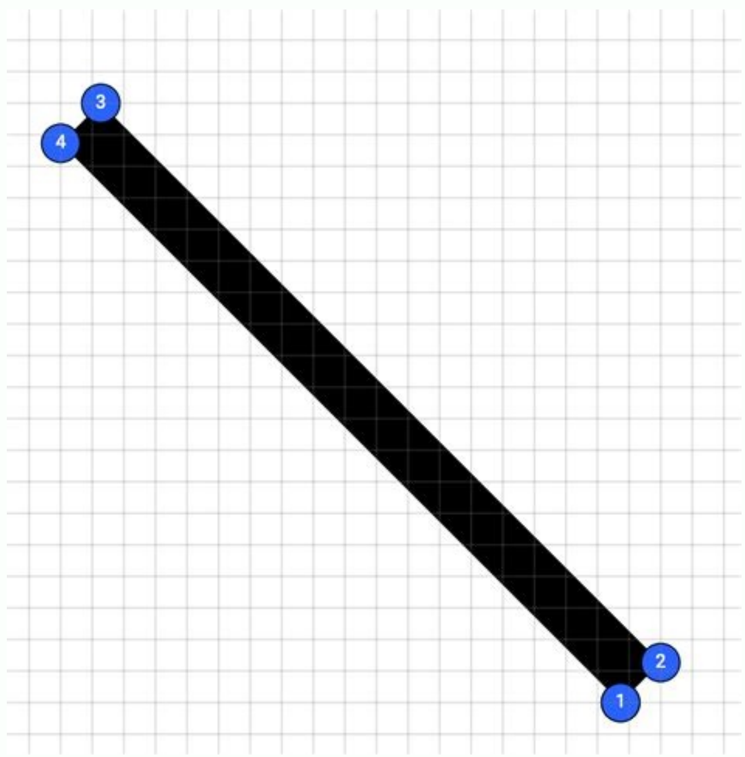
Vector drawable to bitmap android









A Drawable resource is a general concept for a graph that can be drawn. The simplest case is a graphic file (Bitmap), which would be represented on Android through a bitmapdrawable class. Each Drawable is stored as individual files in one of the RES / Drawable folders. Normally bitmaps are stored for different resolutions in subfolders -MDPI, -HDPI, -XHDPI, -XXHDPI RES / Drawable. The project creation assistant ADT creates these folders by default. If these bitmaps are provided in a different folder, the Android system automatically selects the correct one in the function of the device configuration. If you do not provide bitmaps for all compatible resolutions, the Android system will scal the most close-up adjustment up or down. This is usually undesirable since the bitmap could become blurred. In addition to the graphic files, Android supports XML designs and 9 patches graphics. XML drawings are used to describe forms (color, edge, gradient), state, transitions and much more. The 9-patch graphics are used to define what part of a graph should be stretched if the view that this graph uses is more than graphic. Drawables can also be written in Java Code. Each object that implements Drawable can be used as Drawable in Code. First of all, you can not cast the BitmapDrawable VectorDrawable. They do not have a parent-child relationship. Both are direct subclasses of the Drawable class. Now, to get a drawing bits map, you will need to create a bitmap from the drawing metadata. Probably something like another, try {bitmap bitmap; bitmap = bitmap.createbitmap (Drawable.getinthrinsicwidth (), Drawable.getinTrinsicheight (), bitmap.config.argb_8888); Canvas = New Canvas (Bitmap); Drawable.SetBounds (0, 0, canvas.getwidth (), canvas.getheight ()); Drawable.Draw (Canvas); Return Bitmap; } (OutOfMemoryError e) { // Handles the null return error; } I hope this helps. Use Drawable.toBitmap () from the AndroidX support library. VectorDrawable is a child of Drawable. Tags: Android Android Ontouchlistener Getpixel Android Vectordrawable Crear diversiÃ³n separada de Vector a Bitmap //vectorToBitmapMarker diversiÃ³n privada deVectorToBitmap(id: Int, color: Int): BitmapDescriptor { vector val: Â¿Drawable? = RecursosCompat.getDrawable(resources, id, null) si (vectorDrawable == null) { d("VTOB","Resource not found!") retorno BitmapDescriptorFactory.defaultMarker() } val bitmap = Bitmap.createBitmap(vectorDrawable. Archivo de error(s)Funcion de error(s) de archivo(s)(s) de archivo(s))(s) de imagen(s) de archivo(s)(s) de archivo(s) de imagen(s) * Comprobado en API: 17, 21, 23 static Bitmap getBitmapDesdeVectorDrawable(Context context, int drawable Id) { Dibujo dibujable = AppCompatDrawableManager.get() .getDrawable(context, drawableId); si (Build.VERSION.SDK_INT Construir. VersiÃ³n_CODES.LOLLIPOP) {cantilable = (DrawableCompat.wrap(drawable)).mutate(); } Bitmap bitmap = Bitmap.createBitmap(drawable.getIntrinsicWidth(), drawable.getIntrinsicHeight(), Bitmap.Config.ARGB_88); ... androide { compilar SdkVersion 23 buildToolsVersion '23.0.3' defaultConfig { minSdkVersion 16 targetSdkVersion 23 vectorDrawables.useSupportLibrary = true } ... } ... Tomo una From the user and add the white background with Glide. The problem is that I need to get the byte matrix of that image and I can not get it because the image that is being maintained in the image is a vectordawrable. I can not convert this back to the bitmap and, therefore, to a byte matrix. I tried to use it in an image of fictitious PNG, how to follow .bitmap oldbitmap = bitmapfactory.decodereurce (getresources (), r.drawable.test_image); Glide.with (fingerprintsSeforestivity. This) .Load (Oldbitmap) .into (New SimpleTarget () {@Override Public Void OnresourcereAd (Drawable Resources, Transition
