Dixit

Contenido
- 1 tablero de juego en el interior de la caja (con escala de puntuación)
- 64 cartas
- 36 fichas de voto de 6 colores diferentes numeradas del 1 al 6
- 6 concejos de madera

carta elegida al cuentacuentos sin que los demás jugadores puedan verla.
El cuentacuentos baraja su carta con las que ha recibido de los otros jugadores y las coloca aleatoriamente boca arriba en la mesa. La carta más a la izquierda se considerará la carta 1, la que se encuentra a su derecha será la carta 2 y así sucesivamente.

Encontrar la carta del cuentacuentos: el voto

El objetivo de los jugadores es adivinar cuál de las cartas es la que el cuentacuentos usó para construir su frase. Cada jugador da forma secreta la carta que cree que pertenece al cuentacuentos (el cuentacuentos no puede votar). Para ello, coloca boca abajo frente a él la ficha de voto correspondiente al número de la carta elegida. Una vez que todos los jugadores han votado, se da la vuelta a las fichas de voto y se colocan en las cartas correspondientes.

Nota: No se permite votar la carta propia.

Puntuación

Cada jugador escoge un consejo y lo coloca en la caja 0 de la escala de puntuación. Se barajan las 6 cartas y se reparten 6 a cada jugador. Con el resto se convierte un mazo de robo.

- Para 4 jugadores, cada uno toma 4 fichas de voto (del 1 al 4).

- Para 5 jugadores, cada uno toma 5 fichas de voto (del 1 al 5).

- Para 6 jugadores, cada uno toma 6 fichas de voto (del 1 al 6).

Nota: Las cartas no se pueden enseñar a ninguno de los jugadores.

El juego

El cuentacuentos
Uno de los jugadores hace de cuentacuentos en cada uno de los turnos. Observa sus 6 cartas de la mano y, de entre ellas, debe construir una frase ya decidida en voz alta. Los demás jugadores escuchan la frase.

La frase puede constar de varias frases; para facilitar hecha de una o más palabras, a veces puede ser un sonido. La frase puede ser inventada o puede estar inspirada en la poesía, literatura, cine, etc.

En el primer turno, el primer jugador que encuentre una frase será el cuentacuentos.

Seleccionar una carta para el cuentacuentos

El resto de jugadores seleccionarán de entre sus cartas la que mejor se adapte a la frase construida por el cuentacuentos. Entonces, cada jugador le da la frase.

Final del turno
Cada jugador roba cartas hasta tener 6 en su mano. Ahora el cuentacuentos sera el jugador situado a la izquierda del anterior cuentacuentos y se continua en el sentido de las agujas del reloj para los turnos siguientes.

Fin del juego

El juego termina cuando se roba la última carta. El jugador que más lejos haya llegado en la escala de puntuación es el ganador.

Ejemplo de turno
Tenemos 5 jugadores alrededor de la mesa: Julián, Melide, Nicanor, Leo y Tomás. Julián es el primer jugador que escucha la frase que dice: "Un perro que corre por la playa". Por lo que comienza la partida siendo el cuentacuentos.

La frase que pronuncia es la siguiente: "¿Dónde está la felicidad?", refiriéndose a la película francesa "La felicidad está en el campo". Después de escuchar la frase, los jugadores tienen que escoger una carta de su mano que se adapte a la frase de Julian. Leo tiene estas 6 cartas:

ningún voto. En el siguiente turno, Tomás será el cuentacuentos porque estaba sentado a la izquierda de Julian.

Pistas

Si la frase del cuentacuentos describe la carta de forma demasiado precisa, todos los jugadores adivinarán fácilmente la carta por lo que no obtendrá ningún punto. En el caso contrario, si la frase es demasiado extraña y tiene poco que ver con la carta, nadie podrá adivinarlo, por lo que tampoco obtendrá puntos. Por lo tanto, la dificultad es encontrar una frase que no sea ni demasiado obvia ni demasiado abstracta, porque hay posibilidades de que algún jugador adivine, pero no todos. Al principio, puede resultar difícil de conseguir, pero conforme avanza los turnos, la inspiración llega!

Variantes

3 jugadores: cada jugador coge 7 cartas, en lugar de 6. Cada jugador excepto el cuentacuentos entres 2 cartas en lugar de una, con lo que se avenen.
